

The Neem Tree is considered to be one of the most promising trees of the 21st Century. It has great potential in the field of Pest Management.

Neem Oil comes from the pressed seed of the neem tree, *Azadiracta indica* Juss. It's native to eastern India and Burma and has been used for medicinal purposes and pest control in India for thousands of years. Neem Oil has been found to be an effective insect repellent and antifeedant which discourages insects feeding patterns. Insects would rather die than eat plants treated with neem oil. Neem Oil application does not pose any threat to people or pets.
