

## Windcone Spray Wand

Designed for nursery growers, we built this wand to be abused!

The heavy duty windcone is designed to go under branches, and the aluminum wand is strong enough to knock branches out of the way.

Different nozzle sizes are readily available. However, the windcone is designed for 80 degree nozzles, giving a 20" - 24" pattern.

The trigger is rebuildable and is also sold separately.

Two hands are required, and a no-drip nozzle body is standard.
