

## **Green Garde JD9-C Gun**

As an "all-round" high pressure spray gun, there is no better choice. It is standard equipment on all of our greenhouse sprayers. For most greenhouse crops, the small nozzle is great for whitewash.

For tree & shrub spraying, the large and x-large are the most popular ( a height of 35 ft. can be reached). The JD9-C gun is one-handed operation, allowing your other hand to remain free to guide the hose.

Parts and kits to rebuild the gun are readily available. The gun lasts for years.

Due to the popularity of the JD9-C, companies have tried to copy it. We have field tested the copies, and they do not come close to the precision machining, ease of use or durability. You definitely get what you pay for.
