Spray Water Conditioner! Buffer and pH Indicator

For use with alkaline sensitive pesticides and foliar nutrition.

Principle functioning agents (by weight)

Acidifier.....	35%
Monomeric glycols.....	5.0%
Indicator.....	0.2%
Inert.....	59.8%
Total.....	100%

Mixing Instructions:

Water Hardness	Application Rate (mL/100 L water)
Low	40-50 mL/100 L water
Medium	50-60 mL/100 L water
Medium Hard	100-120 mL/100 L water
Hard	180-200 mL/100 L water
Extra Hard	200 mL/100 L water

1. Always add Exact pH™ to spray water first.
2. If colour change does not occur with the first addition of Exact pH™ continue adding in 10 mL intervals until correct colour is observed.

•Automatically adjust pH to 4.5-5 (no need for pH measurements).

•Neutralizes and acidifies hard water salts.

•Can be safely used at higher doses to alleviate water hardness.

•Colour changes to orange indicate hard water and more Exact pH™ is required.

•Colour changes to pink to indicate correct pH has been achieved.

Warning:

Keep out of reach of children and store away from food and feedstuff.

Avoid contact with skin and eyes. Wear goggles /faceshield while mixing. Avoid breathing mist or vapours, use adequate ventilation. Wear chemical resistant gloves and protective clothing that is impervious under conditions of use. Read and follow label directions and cautions on all products used.
