

CRAB ARREST

Crabgrass
Control

PRE-EMERGENT CRABGRASS CONTROL

Reg. No: 32210 P.C.P Act

CRAB ARREST

Crab Arrest is a dynamic new corn gluten blend (95%) which is fortified to improve efficacy. It is specially formulated to offer superior crabgrass suppression. It's inhibitory effect can last up to five weeks, ensuring your turf has more time to thicken up before summer stresses emerge. Crab Arrest is a granular product that contains at least 9% nitrogen, derived from an organic source.

- Apply in May or before forsythia finishes blooming
- Apply before soil temperatures reach 13°C
- Crab Arrest must be watered in to activate the product
