

SEED & FEED

3 - 1 - 1

A proprietary blend of granulated compost with added soil ammendments, mixed with patented spreading seed.

SEED & FEED

Our proprietary Seed and Feed formula delivers the ideal mix of patented grass seed with compost to ensure a quick and successful seeding every time*. Seed and Feed is perfect for overseeding applications, spot repairs or as part of a maintenance program to thicken lawns and other turfgrass areas.

Our compost, which is granulated with added soil ammendments, is dust and odor free and spreads easily. It stimulates microbial activity and boosts soil health, while delivering much needed nutrients to young, establishing plants.

After several years of testing and development, we are confident our Seed and Feed will outperform any of its competitors.

BAG SIZE: 40 LB
APPLICATION RATE:
10 LB/1,000 FT²
