

Filling a 20 gallon Treegator Original is as Simple as 1...2...3 !

Step 1:

- Place on tree trunk, with the zippers on the uphill side of the tree.
- Wrap both sides around trunk (1-4" dia.) until zippers meet.
- Zip sides of bag together from bottom to top.

Step 2:

- Lift tag to expose fill opening at top of bag.
- Insert hose into fill opening and begin filling with water.
- Add pre-mixed water soluble fertilizer, if desired.

Step 3:

- Fill bag to only 1/4 capacity.
- Gently lift on straps to expand bag.
- Fill to desired level & let drip until empty.
