

Stens introduced its first parts catalogue in 1970 and has been growing ever since. Stens has always been associated with quality products and outstanding service, two qualities that we here at Rittenhouse strive to achieve every day. As a result, Stens can produce a product that is just as good as the Original Equipment Manufacturers (OEM), or sometimes even better! Not only do these aftermarket parts boast excellent quality, but they are also less expensive than OEM parts. This is a win-win for you, the green industry professional, who needs to ensure that your bottom line is protected without sacrificing quality.

The benefits of ordering aftermarket parts from Rittenhouse are simple: quality products; saving money; and saving time. We look forward to being able to serve our customers further.
